Subject: ODEQ Website for distributing Fire Incident info
Date: Friday, July 21, 2023 8:06:08 PM

Hi Faye and Team,

ODEQ is hosting an incident website for this incident, www.odeq.org/kmartfire, that has info, FAQ's, health info.

Please forward to field crews in case residents come up and ask for info. Field crews should direct residents to the website for information. They should not really field questions and they can offer that they are working for the EPA in helping the city and state in assessing the area and taking air samples. Data will be forthcoming from Unified Command once it is available. In the meantime, Portland Bureau of Emergency Management is working to put up a call-in center.

- Richard
